

GLOBAL CORONAVIRUS INFORMATION

Last update: 2 April 2020 10:00am GMT+1

OUR APPROACH

The worldwide transportation industry is facing a variety of interruptions caused by the coronavirus. At Bertling we are monitoring the evolving COVID-19 outbreak, its spread and impact on global supply chains, our operations, employees and business partners closely. Every day we are taking additional precautionary measures to ensure we safeguard the health of our employees, help containing further spread and ensure business continuity.

We have developed operational continuity plans in collaboration with your local teams to ensure we have sufficient resources in place to keep operations and our usual services going. If required, we will do all we can to look for alternative transport modes and routes to handle your transports.

WE REMAIN OPERATIONAL

To date all our offices are operational. While our offices in ASPAC are up and running as usual, the Corona impact on our offices in Europe, North and South America, the Middle East and Africa has just started. Those employees who can do their jobs from home will continue to work from there until further notice. In some offices only skeleton staff remains, while in others employees work on rotation or split shifts. Business and personal travel guidelines were implemented as well as regulations on hygiene, quarantine and sickness in line with local regulations and advice.

Therefore, any inquiries and questions regarding your shipment or any local disruptions caused by the coronavirus can be addressed to your usual Bertling contacts. Here you can find the contact details of all our global offices: <https://www.bertling.com/worldwide-offices/>.

You can be sure that we will continue to leverage our global network, workforce and suppliers to help our valued customers and business partners through these uncertain times.

We are convinced that if every one of us and every business contributes a little bit, we can all help to combat COVID-19 and eventually return to normality.

Please stay safe and all the best!
