Bertling Logistics launches time-definite products for its global airfreight services

Five products for global air freight logistics

Düsseldorf, Germany – 05.06.2024 – In line with the increasing global demand for specialised airfreight services from our customers, we are pleased to introduce our global time-definite airfreight products, which support individual service requirements through various verticals from airport to airport. In addition to these airfreight services, we offer door-to-door services within our global network, as well as customs brokerage and other value-added services.

Whether clients are looking for alternatives to disrupted modes of transport, a highly technical air charter solution for your time-sensitive freight, or a fast and reliable solution for urgent deliveries, our IATA licensed team of air freight experts will find the most suitable solution to get your cargo delivered on time. Our team in Düsseldorf works closely with our company-wide regional air freight hubs in locations such as Singapore, China, UAE, USA, Chile, and South Africa, as well as our extensive network of airline partners.

A few weeks ago, we were delighted to announce the opening of our new office in Düsseldorf, located in the vibrant Düsseldorf Media Harbour in the stunning Cradle, Germany's first hybrid timber office building. Situated in the heart of the Düsseldorf Media Harbour, the area is a strategically located within the country triangle of the Netherlands, Belgium and Germany. At a distance of 250-550km from the major airports of Frankfurt, Amsterdam, Brussels, Liege and 8 km from Düsseldorf International Airport, this is an excellent area to consolidate European import and export shipments.

"We are very excited to expand our presence in Germany with our new office in Düsseldorf, which will house our airfreight and project logistics team," said Colin MacIsaac, CEO of Bertling Logistics. "Our growing team of airfreight experts will provide extended Airfreight Services for our local and global customers more quickly and efficiently," Colin continued.

"We have chosen Duesseldorf as one of the most flexible and convenient European Airfreight Hub in order to be agile and flexible to our customers' needs, working on virtual EU consolidations using the various airports of Düsseldorf, Frankfurt, Amsterdam, Liege and Maastricht. We also offer centralised special services such as charter, OBCs, cargo drone services," says Janine Seemke, Global Head of Airfreight.

Airfreight with a touch of green

Each of our airfreight logistics products and services can be booked with our fifth product “B. Green” for sustainable airfreight shipments, by using Sustainable Aviation Fuel (SAF), efficient route planning, consolidation and/or emission compensation solutions. Bertling’s in-house developed Carbon Footprint Tracker helps to calculate pre- and post-flight emissions the flight, identify opportunities to reduce emissions and/or to compensate for unavoidable emissions by supporting one of Bertling’s four preferred global compensation projects. Come and fly with us

Our IATA-trained airfreight experts are ready to handle our airfreight shipments to the highest electronic and efficient standards," says Janine Seemke, Global Head of Airfreight and Head of our Düsseldorf office. "Whether it is general cargo, special dangerous goods or project cargo, our experts will find the right airfreight solution for your logistics needs," Janine continues. "We look forward to receiving your enquiries and are committed to providing excellent customer service and quality solutions to meet your airfreight logistics needs."

ABOUT BERTLING

Bertling was founded in Germany more than 159 years ago and has since then developed from a local chartering and ship-owning business to a globally recognized logistics and shipping company offering complex project freight forwarding, GFF and resupply transport solutions as well as worldwide leading ship-owning, chartering and brokerage services to its global clients. Bertling’s value add in-house IT services encompass state-of-the art transport management tools, real-time tracking/tracing, reporting and overall digitalization solutions to build sustainable, highly visible and efficiently-run supply-chains for transports and projects of any scale.

Working with an international network of 50 offices in 30 countries and dedicated partners plus 700 logistics employees, Bertling is ideally positioned to provide end-to-end turnkey logistics and shipping services to the power generation, oil & gas, mining & construction, infrastructure, renewables and petrochemical industry. To Bertling’s highly specialized logistics services also belong Bertling Enviro, Bertling Bulk Liquids, Bertling Class 1 and Bertling Trucking solutions.

RELATED PICTURES FOR POTENTIAL INCLUSION IN THE ARTICLE

The image is a screenshot of a webpage titled "OUR AIRFREIGHT PRODUCTS" from Bertling Airfreight Logistics. The page features a header with the Bertling logo and a main heading "AIRFREIGHT SERVICES TAILORED TO YOUR TRANSPORT NEEDS". Below this, a sub-heading states "Globally, we offer five specialized airfreight products depending on your timescale and freight type:". The main content area is divided into five sections, each with an icon of a globe and an airplane, a product name in a blue box, and a descriptive text box. The products are: B. Express (fastest service), B. Prio (reliable service), B. Essential (most convenient service), B. Cargo (freighter solutions), and B. Green (sustainable service). The background of the page is a sunset sky over a body of water. A small "Page 3" label is visible in the bottom right corner of the screenshot.
